ROSHAN YADAV

Associate Frontend Developer | React.js | JavaScript | REST API Integration | Frontend Testing

roshanarvind1@gmail.com | +91 7383735882 | linkedin.com/in/roshan-yadav | github.com/roshan-yadav-dev

PROFESSIONAL SUMMARY

B.Tech Computer Science student (2027) building interactive React applications with component-based architecture, custom hooks, Context API, and REST API integration. Shipped Nexvia (React 18, JWT access/refresh auth with automatic token refresh, Recharts analytics dashboard) and API-Workspace (React 19, layered components/hooks/services, Vitest + React Testing Library tests, ARIA tab roles and keyboard-operable lists). Solid CS fundamentals with 500+ DSA problems solved.

TECHNICAL SKILLS

Frontend: React.js (18, 19), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Router, React Hooks, custom hooks, Context API, Vite, Recharts, responsive design, reusable UI components

State, Data & API: Component and lifted state, Axios (request/response interceptors), Fetch API, REST APIs, JWT access/refresh flows, protected routes, form validation, error handling, Postman

Browser Storage: localStorage (persisted history and collections behind a storage service layer), sessionStorage, httpOnly-cookie refresh tokens

Testing & Quality: Vitest, React Testing Library, jest-dom, user-event, Jest, Supertest (backend API tests), ESLint, functional and regression testing

Accessibility (foundational): Semantic labels (label/htmlFor, alt text), ARIA roles and labels, keyboard handlers, Escape-to-close modals

Backend & Languages: Node.js, Express.js, MongoDB, FastAPI, Python, Java, Kotlin; DSA, OOP, DBMS, OS, Computer Networks

Tools: Git, GitHub, Docker, Vercel, Render, GitHub Copilot, Claude Code, ServiceNow ATF

PROJECTS

Nexvia — *Personal Web-Presence Platform* github.com/roshan-yadav-dev/Nexvia

React 18, Vite, Tailwind CSS, React Router, Context API, Axios, Recharts, Node.js, Express, MongoDB

- Built a multi-page React 18 product (link studio, portfolio manager, bio builder, analytics dashboard, public profile pages) on a shared set of UI primitives (Button, Card, Input, Modal, Badge) styled with Tailwind CSS.
- Implemented JWT authentication: access token held in memory, refresh token in an httpOnly cookie, and an Axios response interceptor that refreshes on 401 and queues concurrent failed requests; exposed through AuthContext and a ProtectedRoute guard.
- Built a bio builder with three switchable themes and a live mobile preview; developed Link Studio UI with inline editing, copy-to-clipboard, activation toggles, and SVG/PNG QR code export (qrcode.react).
- Created an analytics dashboard with Recharts area and donut charts consuming REST aggregation endpoints (daily clicks, device split, referrers, top links); modals support Escape-to-close and body scroll locking.
- Wrote 35 Jest and Supertest API tests for the Express backend (auth, links, analytics, bio, security); backend validates input with Zod and applies Helmet and rate limiting.

API-Workspace — *Developer-Oriented API Testing Application* github.com/roshan-yadav-dev/API-Workspace

React 19, Vite, React Router, react-hot-toast, Vitest, React Testing Library, FastAPI (JWT)

- Built a Postman-style workspace: GET/POST/PUT/PATCH/DELETE requests with custom headers, JSON bodies, Bearer/API-key/Basic auth, response viewer (status, time via performance.now, size) and syntax-highlighted JSON output.
- Structured the frontend into components, custom hooks (useApiWorkspace, useHistory, useCollections, useAuth), services, utils, and constants; isolated localStorage access in a storage service with a capped history list.
- Added ARIA tablist/tab/tabpanel markup, labelled controls, and keyboard-operable history and collection rows (tabIndex, onKeyDown); implemented register/login flows with protected routes.
- Authored Vitest and React Testing Library tests covering tab switching, JSON formatting, history search, collections, and auth-header utilities.

EDUCATION

Bachelor of Technology, Computer Science Engineering | Parul University | CGPA: 8.19/10 2023 – 2027

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ Data Structures & Algorithms problems across LeetCode, CodeChef, and HackerRank.
- ServiceNow Certified System Administrator (CSA), 2026 | ServiceNow Certified Application Developer (CAD), 2026 | AI & Machine Learning Certification, Edunet Foundation, 2025
